[1 or 2 Strength (adjectives)] [Your_title] with [X] years of experience in the [creating/Building/deploying/Managing] [few_best_practice architecture] for [industry/project] using the [your core tech skills] Proven track record as a [adjective][your_role] for [achieving any end goal with some quantifiable metrics if possible] [You can fine-tune this script as per your own creativity and profile]

Work History

2020-01 - present

Data Engineer-II

Azurelib.com, Indore

- Describe crisp and clear work you have done in this position
- Be specific then writing generic stuff or beating around the bush. (For example, Developed a well optimized ADF pipeline which has reduced the execution time by 20%)
- Every statement should be written in such a way that it may help your employer.
- Not only showcase your tech skills here, try to include your leadership / team managing / Client management skills as well (if possible)
- You can always tweak resume little bit for every job requirement based on the need.
- Resume is just a starting point in your job hunting process. Relax, your resume need not to be perfect. Try to make it just relevant. There is nothing like right or wrong.

2018-01 - 2020-12

Data Engineer-I

Azurelib.com, Indore

- Feel free to make changes to this template as per your profile and role.
- Take 5 minutes and think about all the roles you played in the project example (developer, admin, deploy code, support, monitoring, testing, managing client., taking requirements, product owner, etc)
- All these are your strength try to project them as well.
- But keep balance in your main skill and side skill.
- These interviewers love Git /Agile/Some extra common tools irrespective of profile. Do add them as well.
- ResyMatch popular tool to check whether your resume is ATS compatible or not. (This template is ATS passed one)
- Take a break and just check your resume with an Interviewer mindset/eyes and do proof-reading.
- Try to keep resume size up to 1 page. But if it goes up to 2 pages it is fine.
- Just ensure your resume PDF/Word format has proper alignments [Just like this template]
- Pro Tip: Always Based on the Job requirement, update the skill set, to get your resume noticed.

Education

2004-07 - 2008-06

Computer Science, B. Tech. (Bachelors of Technology)

RGPV, Indore

[Your score]: Add if you feel something worth to mention here. Otherwise you can keep it blank
